

WELLNESS ADVICE GUIDE FOR TEFL TEACHERS (ABROAD & ONLINE)

A practical guide from the TEFL Institute of Ireland to help you thrive — in class, online, and on the road.

 THE
TEFL
INSTITUTE

Foreword

from Katie Troy, Managing Director, The TEFL Institute of Ireland

At the TEFL Institute of Ireland, we know that teaching English abroad or online can be a truly life-changing experience. It opens the door to adventure, cultural discovery, and meaningful human connection. Yet it also asks a lot of you — resilience, adaptability, and emotional energy.

This guide was created to help you care for your most valuable teaching tool: yourself. Mental health and wellness are not afterthoughts; they are the foundation of great teaching. Whether you're navigating culture shock abroad or managing online fatigue, the pages ahead offer reassurance, strategies, and inspiration drawn from real teachers' experiences. Take this guide with you on your journey. Read it on quiet mornings or after a long day's work. Let it remind you that you're never alone — there's a whole community of TEFL teachers walking a similar path and cheering you on.

*With warmth and encouragement, **Katie.***

*“Happiness can be found even in the darkest of times, if one only remembers to turn on the light.” - **J.K. Rowling***

1. The TEFL Wellbeing Framework

Building a Foundation of Wellness

Wellbeing is not a luxury; it's the foundation of your professional and personal success. As a TEFL teacher, you balance lesson planning, cultural adjustments, and student engagement, often in unfamiliar environments. It's easy to neglect your own needs when focusing on others. A healthy teacher is a better teacher—one who has the patience, creativity, and resilience to support students and thrive in new experiences.

The TEFL Wellbeing Framework is built on five interconnected pillars: rest, movement, nutrition, connection, and purpose. Each one strengthens the others. When one pillar weakens, the entire structure can feel unstable. By nurturing each element, you create balance and energy for your teaching life.

The Five Pillars Explained

- 1 Rest and Sleep** - Sleep restores your patience and mental clarity. It's the foundation for emotional balance and resilience. Prioritise consistent bedtimes and quality rest, even when schedules vary.
- 2 Movement and Energy** - Daily activity, no matter how small, improves focus and relieves stress. Walking to work, stretching between lessons, or exploring new surroundings can make a huge difference.

- 3 Nutrition and Hydration** - Regular, balanced meals help regulate mood and concentration. Staying hydrated keeps your energy levels steady.
- 4 Connection and Belonging** - Healthy relationships are vital for motivation. Seek out friendships, communities, and connections with students that make you feel supported and valued.
- 5 Purpose and Meaning** - Reflect on your "why." Remember what inspired you to teach. A sense of purpose sustains you through challenges.

Tips for Wellness Success

- ✓ Choose one pillar to focus on each week and set a small, realistic goal.
- ✓ Create simple daily rituals such as journaling, walking, or stretching.
- ✓ Reassess your wellbeing monthly to see which pillar needs more attention.
- ✓ Celebrate progress—consistency matters more than perfection.

2. Culture Shock & Adaptation

Understanding Cultural Adjustment

Culture shock is more than homesickness—it's a psychological response to unfamiliar customs, values, and communication styles. It can affect anyone moving into a new cultural environment. Teachers abroad often begin with enthusiasm but may later experience confusion or frustration as they adapt to new systems, languages, or social norms. The good news is that this is a natural, temporary stage of adjustment.

For Teachers Abroad: The best way to manage culture shock is to approach it with curiosity rather than resistance. Learn about your host culture's traditions, eat local food, and explore your surroundings. Keep a journal to document your experiences, noting both challenges and moments of wonder. Engage with locals and expat communities to build social support. Gradually, what once felt foreign becomes part of your daily routine.

For Online Teachers: Even without moving countries, online teachers face cultural differences. You might teach students from multiple nations with diverse expectations and communication styles. Take time to research cultural norms related to greetings, learning styles, and politeness in your students' countries. This awareness deepens classroom rapport and cultural empathy.

Tips for Wellness Success

- ✓ Be patient with yourself—adjustment takes time.
- ✓ Learn and use key phrases from your students' or host country's language.
- ✓ Reflect on cultural experiences in a journal to track growth.
- ✓ Connect with both local and international teacher communities.

3. Homesickness & Loneliness

Finding Comfort in New Surroundings

Homesickness can strike unexpectedly, even after weeks of excitement. Missing familiar routines, loved ones, or simple comforts can lead to isolation. The key is to create a sense of home wherever you are.

For Teachers Abroad: Build emotional stability through routine. Schedule regular calls with loved ones but balance them with local connections. Join activities that spark joy, such as cooking classes, book clubs, or sports groups. Replacing passive isolation with active engagement helps transform loneliness into belonging.

For Online Teachers: Teaching from home can lead to social disconnection. Structure your days with clear start and finish times, and make social interaction part of your weekly routine. Join virtual teacher communities or visit local co-working spaces to meet other professionals. Sometimes, a simple change of scenery helps re-energise your mindset.

Tips for Wellness Success

- ✓ Plan at least one social or outdoor activity each week.
- ✓ Limit social media scrolling and connect in real life.
- ✓ Keep your workspace bright and welcoming.
- ✓ Celebrate small milestones and self-growth.

4. Burnout & Compassion Fatigue

Recognising Emotional Exhaustion

Teaching is emotionally intensive. You give constantly—attention, empathy, energy—and sometimes forget to refill your own reserves. Burnout develops when stress accumulates faster than recovery. Compassion fatigue can follow, leaving you emotionally drained even if you still care deeply about your students.

For Teachers Abroad: Balance is your greatest ally. Protect your days off and allow yourself time to recharge. Avoid overcommitting to classes or social events. Schedule downtime just as intentionally as lesson prep. Connect with fellow teachers who understand the pressures you face.

For Online Teachers: Without physical separation between home and work, it's easy to overwork. Designate a workspace and define your teaching hours. End your day with a “closing ritual” such as stretching, journaling, or going for a walk. Give yourself permission to step away from screens and students to recharge fully.

Tips for Wellness Success

- ✓ Take short, regular breaks throughout your day.
- ✓ Prioritise hobbies that make you feel relaxed and fulfilled.
- ✓ Acknowledge your limits—resting is productive.
- ✓ Talk to trusted peers or mentors about your workload.

5. Sleep Disruption & Jet Lag

Restoring Rhythm and Recovery

Sleep is one of the most underrated yet essential components of good mental health. For TEFL teachers, especially those travelling or teaching across time zones, disrupted sleep can quickly affect mood, focus, and energy. When sleep is neglected, small frustrations can feel overwhelming, and joy can be harder to find. Rest isn't a reward—it's a necessity.

For Teachers Abroad: Jet lag and changing routines are common challenges. It's important to plan ahead before travelling, adjusting your sleep schedule a few days prior to departure. Exposure to natural daylight helps your body adapt, as does staying hydrated and avoiding excessive caffeine or alcohol on travel days. Once settled, develop consistent bedtime rituals—gentle stretching, a warm shower, or reading can help signal to your body that it's time to rest. Try not to overfill your evenings with social events in the first few weeks of teaching; give your mind and body time to catch up.

For Online Teachers: Working across time zones can easily disturb sleep patterns. Teaching late-night lessons or working irregular hours confuses your body's natural rhythm. Set boundaries with your schedule—decide which hours are sustainable long-term and communicate them clearly to your students. Consider using blue-light filters or glasses to reduce screen strain, and create an evening routine that separates work from rest. Journaling or deep breathing can also help quieten a busy mind before bed.

Tips for Wellness Success

- ✓ Keep a regular bedtime and wake-up schedule.
- ✓ Create a relaxing bedtime ritual and limit screen time.
- ✓ Adjust to new time zones gradually before travel.
- ✓ Treat rest as essential, not optional.

6. Physical Inactivity, Posture & Ergonomics

Movement for Mind and Body

Teaching, whether online or in the classroom, often involves long periods of standing or sitting. Over time, this can lead to physical discomfort, stiffness, or fatigue—all of which affect mental wellbeing. Movement is one of the simplest yet most powerful tools to restore energy and focus. The body and mind are deeply connected; when one moves, the other relaxes.

For Teachers Abroad: Make movement part of your daily rhythm. Walk or cycle to work if possible, explore your local neighbourhood on foot, or join a local exercise class. Incorporate physical activity into lessons by using games or activities that require students to move around. These small habits prevent stiffness and add liveliness to your teaching.

For Online Teachers: Sitting for long hours can be draining. Set up your workspace ergonomically: your screen should be at eye level, your back supported, and your feet flat on the ground. Take regular stretch breaks—every 90 minutes, step away from the screen, roll your shoulders, or stretch your hips and neck. Simple changes, such as standing for part of a lesson or investing in a supportive chair, can make a significant difference.

Tips for Wellness Success

- ✓ Move your body daily—stretch, walk, or take a short yoga session.
- ✓ Adjust your workspace for comfort and proper posture.
- ✓ Take regular breaks to rest your eyes and joints.
- ✓ Integrate active learning moments into lessons.

7. Mental Fatigue, Screen Overload & Digital Boundaries

Finding Focus in a Connected World

Modern teaching, especially online, involves constant engagement with screens, messages, and digital resources. The result can be mental fatigue—feeling tired even when physically rested. Constant multitasking divides attention and drains energy. Setting boundaries with technology is one of the healthiest steps you can take for your mind.

For Teachers Abroad: Although much of your work may take place in a classroom, lesson preparation and communication often happen online. Schedule screen-free hours each day to give your mind space to reset. Print materials when possible, use a paper planner, or enjoy time outdoors without devices after work. Reconnecting with your environment helps restore clarity and calm.

For Online Teachers: The temptation to overwork is high when your classroom is your laptop. Limit late-night messages and turn off notifications outside work hours. Avoid back-to-back classes to prevent “Zoom fatigue.” At the end of the day, step away from your workspace completely—close the laptop, tidy your desk, and transition into personal time with a relaxing ritual. Your brain needs this separation to recover fully.

Tips for Wellness Success

- ✓ Schedule daily screen-free time.
- ✓ Avoid multitasking and focus on one task at a time.
- ✓ Turn off notifications during breaks and evenings.
- ✓ Choose hobbies that reconnect you with the offline world.

“You, yourself, as much as anybody in the entire universe, deserve your love and affection.”

– *Buddha*

8. Financial Stress & Job Insecurity

Stability for Peace of Mind

Money worries are one of the most common stressors for TEFL teachers. Whether it's inconsistent income, visa restrictions, or fluctuating class bookings, financial insecurity can cause anxiety that affects every area of life. Feeling secure financially doesn't necessarily mean earning more—it means managing what you have wisely and planning for the unexpected.

For Teachers Abroad: Before accepting a position, read your contract carefully and understand pay schedules, accommodation arrangements, and benefits. Keep an emergency fund for travel, medical care, or unexpected gaps between paydays. Connect with other teachers in your area for practical advice on budgeting, cost of living, and reliable services. Awareness reduces anxiety and helps you feel more in control.

For Online Teachers: Online teaching income can fluctuate depending on student demand and platform algorithms. Diversify your teaching income by offering private lessons or specialised classes. Use budgeting tools or apps to track expenses and savings. Setting financial boundaries—such as how many hours you'll work or what rates you'll accept—protects your time and wellbeing.

Tips for Wellness Success

- ✓ Track income and expenses to stay aware of financial health.
- ✓ Set clear work boundaries to avoid burnout from overbooking.
- ✓ Build a small emergency fund for peace of mind.
- ✓ Seek financial advice or community tips for saving abroad.

9. Healthcare Access, Medication & Insurance

Staying Healthy and Prepared

Health challenges can be stressful anywhere, but when living abroad or teaching online across borders, they often come with added uncertainty. Accessing reliable healthcare and managing medication can be daunting, particularly if you're navigating language barriers or unfamiliar systems. Prioritising your health gives you peace of mind and ensures you can focus fully on your teaching.

For Teachers Abroad: Before travelling, research the healthcare system in your destination. Identify English-speaking doctors or clinics and register with a local GP once you arrive. Keep a list of emergency numbers, and always carry basic first-aid supplies. If you take regular medication, bring extra supplies and copies of prescriptions, ideally with generic names in case specific brands are unavailable. Ensure your health insurance covers routine and emergency care, mental health support, and any pre-existing conditions.

For Online Teachers: Even when working from home, health planning matters—especially for digital nomads who move between countries. Keep electronic copies of medical documents and vaccination records. Familiarise yourself with telehealth services that allow you to consult with a doctor remotely. Schedule regular check-ups, especially if your work routine leads to long periods of sitting or screen use.

Tips for Wellness Success

- ✓ Keep an updated list of emergency numbers and nearest clinics.
- ✓ Maintain a three-month supply of essential medications.
- ✓ Understand your insurance policy before you need it.
- ✓ Prioritise preventive care—regular check-ups and exercise.

10. Safety, Boundaries & Professional Conduct

Protecting Yourself and Your Wellbeing

Personal and professional boundaries are vital in any teaching environment. They safeguard your emotional health, protect your reputation, and ensure respectful relationships with students, colleagues, and employers. For TEFL teachers—often working in unfamiliar or less regulated environments—knowing how to stay safe both physically and digitally is essential.

For Teachers Abroad: Learn local laws and customs, particularly those affecting your personal safety or workplace behaviour. Share your location when travelling to new places, and have a trusted colleague or friend you check in with regularly. In the classroom, maintain clear professional boundaries—avoid overfamiliarity or private meetings that could blur lines. Familiarise yourself with your school’s safeguarding and reporting policies.

For Online Teachers: Protect your privacy by keeping separate professional accounts for work and using neutral backgrounds in lessons. Never share personal contact details with students, and report any inappropriate behaviour immediately. Keep a record of communications and establish clear policies for cancellations and scheduling.

Tips for Wellness Success

- ✓ Set clear personal and professional boundaries from the start.
- ✓ Keep digital privacy—separate personal and work information.
- ✓ Share your travel or work plans with trusted contacts.
- ✓ Review safety procedures and safeguarding training annually.

11. Workload, Time Management & Admin Overwhelm

Balancing Commitments and Self-Care

TEFL teachers often juggle multiple responsibilities—lesson planning, marking, meetings, and communication with parents or students. Without structure, these tasks can quickly feel overwhelming. Managing time effectively not only boosts productivity but also protects your mental wellbeing.

For Teachers Abroad: Use consistent weekly planning routines. Allocate time for lesson prep, marking, and personal rest. Keep digital and paper systems tidy, naming files logically to avoid unnecessary stress. Avoid perfectionism—good, consistent teaching is more sustainable than constantly reinventing lessons.

For Online Teachers: Digital overload can be even greater online. Automate tasks where possible using scheduling software and template messages. Limit daily admin to fixed time slots and resist checking messages throughout the day. Establish realistic working hours to protect personal time.

Tips for Wellness Success

- ✓ Plan your week with set times for work, rest, and leisure.
- ✓ Use templates or digital tools to simplify admin tasks.
- ✓ Avoid multitasking—focus on one job at a time.
- ✓ Review workload regularly and adjust when needed.

“Rest is not idle; it’s the invisible work
that makes all other work possible.”

– *Unkown*

12. Classroom Stress: Behaviour, Parents & Expectations

Navigating Challenges in the Classroom

Classroom management can test even the most patient teacher. Behavioural challenges, parental expectations, and cultural differences can all cause stress. The key is preparation, consistency, and self-compassion—no teacher gets everything right all the time.

For Teachers Abroad: Build routines early. Students thrive on predictability, and so do teachers. Set clear classroom rules and communicate them positively. When issues arise, approach them calmly and privately rather than publicly. Keep communication with parents professional, focusing on shared goals for the student. Remember, confidence grows through experience.

For Online Teachers: Managing young learners or mixed-ability groups through a screen requires flexibility. Engage students with short, interactive tasks, and be patient with technical difficulties. When dealing with parents, set expectations clearly at the start regarding communication and lesson structure. Always stay polite but firm if boundaries are crossed.

Tips for Wellness Success

- ✓ Prepare lessons with clear structure to reduce classroom anxiety.
- ✓ Keep feedback focused on solutions, not problems.
- ✓ Debrief challenging lessons and let them go—tomorrow is new.
- ✓ Seek advice from colleagues or mentors for difficult situations.

13. Online-Specific Pressures: Platforms, Algorithms & Isolation

Navigating the Digital Landscape

Online teaching offers flexibility and freedom, but it also comes with unique pressures. Platform algorithms, student ratings, and constant competition can create anxiety. Many teachers also report feeling isolated due to limited contact with colleagues or the repetitive nature of online work.

For Online Teachers: Diversify your teaching platforms and client base to avoid dependence on a single source of income. Build a professional online presence so that your career isn't entirely tied to one company's algorithm. Stay connected with peers through professional forums and social media groups, where sharing experiences can help normalise challenges. Establish digital boundaries by setting a fixed schedule and clear policies for cancellations and messages.

For Teachers Abroad Teaching Online: Combine the flexibility of online teaching with real-world social connections. Co-work in cafés or shared offices to regain the sense of community often missing in digital environments.

Tips for Wellness Success

- ✓ Connect regularly with other online teachers for support and collaboration.
- ✓ Avoid checking platform metrics obsessively—focus on student progress instead.
- ✓ Create a dedicated workspace separate from relaxation areas.
- ✓ Celebrate milestones like student improvement, not just ratings.

14. Identity, Values & Imposter Syndrome

Rediscovering Confidence and Purpose

TEFL teachers often face imposter syndrome—the feeling of not being “qualified enough” or “experienced enough.” This can be intensified by cultural differences, unfamiliar teaching environments, or comparing oneself to others. Your identity as a teacher develops over time, shaped by experience, reflection, and continuous learning.

For Teachers Abroad: Living in another country often triggers self-reflection. It’s easy to feel uncertain about your place in a new culture or school system. Keep a record of achievements, thank-you notes, or student feedback. When doubts arise, review them as tangible proof of your impact. Seek out mentors or colleagues who can help you gain perspective.

For Online Teachers: The lack of physical interaction can sometimes make achievements feel invisible. Combat this by tracking progress—record lesson feedback, save screenshots of positive reviews, and reflect on how far you’ve come. Remember that confidence grows through consistent practice, not perfection.

Tips for Wellness Success

- ✓ Keep a ‘success journal’ of positive feedback and accomplishments.
- ✓ Discuss insecurities with trusted peers or mentors.
- ✓ Reframe mistakes as opportunities to grow.
- ✓ Celebrate your professional and personal growth regularly.

“Wherever you go becomes a part of
you somehow.”

– *Anita Desai*

16. Substance Use, Party Culture & Sustainable Socialising

Enjoying Life Responsibly

New environments and social circles often come with vibrant nightlife and social events. While fun and connection are part of the TEFL adventure, it's important to be aware of your limits. Excessive drinking or substance use can quickly impact sleep, energy, and overall mental health.

For Teachers Abroad: Socialising is an important part of integrating, but it should never come at the cost of your wellbeing. Be aware of local laws and cultural norms regarding alcohol and other substances. Prioritise social activities that don't always revolve around nightlife—explore local cafés, attend community events, or organise daytime outings with friends.

For Online Teachers: Working from home can sometimes lead to overindulgence as a way to unwind or combat loneliness. Create healthy relaxation habits like evening walks, herbal tea, or hobbies that bring satisfaction without reliance on substances.

Tips for Wellness Success

- ✓ Set personal limits and stick to them.
- ✓ Mix social events with daytime or wellness-based activities.
- ✓ Avoid using substances as a coping mechanism for stress or isolation.
- ✓ Find joy in connection and experiences rather than consumption.

17. Climate, Environment & Seasonal Affective Considerations

Adapting to New Environments

Climate and environment influence mood, energy, and motivation more than many teachers realise. Whether it's the humidity of Southeast Asia, the darkness of a Northern winter, or fluctuating air quality in a busy city, environmental factors can have a strong effect on both mental and physical wellbeing. Recognising how these external elements impact your emotions helps you prepare and adapt.

For Teachers Abroad: If you're moving to a new climate, research weather patterns and prepare accordingly. In hot, humid countries, schedule outdoor activities for mornings or evenings and stay hydrated throughout the day. For colder or darker environments, prioritise exposure to daylight—open curtains early, take walks at midday, and consider vitamin D supplements. Indoor plants can also boost air quality and mood.

For Online Teachers: Working indoors for long periods may limit exposure to natural light. Position your desk near a window or use a daylight lamp to replicate sunlight. Keep your workspace ventilated and include greenery where possible. Even brief outdoor breaks help refresh focus and mental clarity.

Tips for Wellness Success

- ✓ Spend time outdoors daily, even for short walks.
- ✓ Adjust routines according to the local climate for comfort and energy.
- ✓ Use natural or artificial light to lift mood in darker seasons.
- ✓ Keep hydrated and maintain air quality in your workspace.

“Travel is not really about leaving our homes, but leaving our habits.”

– *Pico Iyer*

18. Preparing to Return Home: Reverse Culture Shock

Closing One Chapter, Opening Another

Returning home after teaching abroad or living a nomadic lifestyle can feel surprisingly disorienting. You may expect to feel relief, yet many teachers experience reverse culture shock—the sense that home feels unfamiliar after so much growth abroad. Friends and family might not fully understand your experiences, and you may find it difficult to settle back into old routines.

For Teachers Abroad: Acknowledge that this phase is normal. Give yourself time to process your journey and the changes you’ve undergone. Reflect on what you’ve learned and how it’s shaped you. Consider journaling or creating a photo book to celebrate your experiences. Reconnect with local hobbies and communities, using your cross-cultural perspective to enrich your life at home.

For Online Teachers: Returning to a more stable or different routine after long-term travel can feel strange. Ease into new habits slowly, allowing flexibility as you readjust. Maintain international connections you’ve built—they’re valuable personally and professionally.

Tips for Wellness Success

- ✓ Reflect on personal growth and lessons learned abroad.
- ✓ Stay connected with international friends or networks.
- ✓ Give yourself time to readjust to your home culture.
- ✓ Integrate new habits from abroad into your daily life.

Top Tips for Prioritising Your Mental Health

Your TEFL Wellbeing Checklist

- 1 Protect your foundations.**
Sleep well, eat nourishing meals, drink plenty of water, and move your body daily – these basics keep your mind balanced.
- 2 Build boundaries that honour your time.**
Set clear work hours, say “no” when needed, and schedule rest just as you do lessons.
- 3 Create small daily rituals.**
Start or end each day with something grounding – journaling, a short walk, mindful breathing, or a moment of gratitude.
- 4 Stay connected to your people.**
Nurture relationships that lift you up. Reach out regularly to friends, family, and fellow teachers – even a message can make a difference.
- 5 Check in with yourself weekly.**
Notice your mood, energy, and stress levels. Adjust your habits before burnout builds up.
- 6 Embrace imperfection.**
Progress, not perfection, is the goal. Growth often hides inside the moments you find difficult.
- 7 Unplug with intention.**
Take digital breaks. Protect time for hobbies, nature, or quiet reflection – no screens allowed.
- 8 Keep learning for inspiration, not comparison.**
Read, explore, and observe other teachers for ideas – but never measure your worth by someone else’s highlight reel.
- 9 Have a plan for tough days.**
Know your personal coping tools: who to call, where to go, or what helps you calm down when things feel heavy.
- 10 Celebrate small wins.**
Teaching abroad or online is brave work. Recognise your resilience and mark every step forward.

Using TEFL.ai for Support and Growth

TEFL^{AI}

The No. 1 Platform for TEFL Teachers

TEFL.ai is the ultimate digital companion for TEFL teachers worldwide—a supportive and intelligent platform designed to make every part of your teaching journey easier and more fulfilling. As the No. 1 site for TEFL teachers, TEFL.ai provides a powerful suite of tools to support your professional and personal growth.

Mental Health and AI Support: TEFL.ai includes an innovative AI Therapist feature—a friendly, non-clinical chat tool designed to listen and guide you through common challenges such as stress, anxiety, or motivation dips. It offers simple, evidence-informed solutions to help you regain focus, calm, and clarity.

Whether you need to talk after a difficult day or want guidance on maintaining balance, this AI companion is available anytime, anywhere.

Professional Development Tools: TEFL.ai also supports teachers with practical resources to enhance their careers:

- ✦ **CV Builder:** Create professional, polished TEFL CVs effortlessly.
- ✦ **Job Search Tools:** Explore verified global teaching opportunities tailored to your experience.
- ✦ **Lesson Planning Tools:** Access adaptable templates, creative ideas, and AI-assisted lesson design.
- ✦ **Resource Hub:** A growing library of free materials, blogs, and community stories to help teachers succeed.

TEFL.ai brings together technology and compassion to empower teachers to work smarter, teach better, and live well. Whether you're teaching online or in classrooms around the world, it's your all-in-one hub for thriving in the TEFL profession.

Practical Resources and Support

Building Your Support Network

Having trusted resources and tools can make all the difference when maintaining your mental health as a TEFL teacher. Whether you're abroad or online, knowing where to turn when you need help allows you to respond proactively rather than reactively.

Resource	Purpose	Access
Headspace / Calm / Insight timer	Guided meditation and mindfulness	App (Free or paid)
BetterHelp / Talkspace	Online therapy and counselling	Subscription (often covered by insurance)
7 Cups	Peer emotional support	App (free or paid)
Meetup.com	Social and community events	Website (free)
r/TEFL	Teaching community and discussion forum	Reddit (free)
International Schools Review	Advice and reviews for international teachers	Membership
IATEFL / TESOL	Professional associations and global events	Membership

These platforms offer valuable opportunities to learn, connect, and receive support from professionals and peers who understand the TEFL lifestyle.

Real TEFL Teacher Stories

Aisling

Teaching Online During Isolation

When the pandemic forced Aisling to leave her teaching post in Spain, she transitioned to online teaching from her flat in Cork. At first, the isolation was overwhelming. She missed classroom energy and daily human contact. After joining a virtual TEFL teacher group and introducing daily walks, she rebuilt a sense of community and rhythm. Today, she teaches full-time online while mentoring new teachers about self-care and digital balance.

Eoin

Adjusting to Life in Spain

Eoin, originally from Dublin, took his first TEFL role in Madrid. The language barrier and culture shock hit harder than he expected. By attending local language exchanges and practising Spanish daily, he began to integrate. Eoin also joined a weekly teacher support meet-up, where he shared challenges and learned coping techniques for anxiety. Now, he helps new teachers navigate the same journey.

Brian

Burnout to Balance in Thailand

Brian's first teaching year in Chiang Mai was a whirlwind of enthusiasm that quickly led to exhaustion. He took every opportunity and said yes to all requests, leaving no time for rest. When his energy crashed, he began incorporating yoga, journaling, and mindful mornings into his schedule. Within months, he felt calmer, more present, and better able to manage classroom stress. His students noticed the difference too.

“There is hope, even when your brain tells you there isn't.” - **John Green**

When to Seek Professional Help

Recognising When to Reach Out

Even the most experienced teachers can face periods of emotional difficulty. Asking for help is not a weakness—it is a professional act of self-care. If you notice prolonged sadness, anxiety, or loss of motivation, reaching out to a mental health professional can provide clarity, tools, and healing.

You might consider professional support if you experience:

- Persistent sadness, anxiety, or hopelessness for two weeks or more.
- Significant changes in sleep, appetite, or energy.
- Difficulty concentrating or making decisions.
- Loss of interest in usual activities.
- Thoughts of self-harm or feeling unsafe with yourself.

Remember, early intervention is powerful. Talking to someone trained to help can lighten the emotional load and offer pathways to recovery.

Finding Help Abroad or Online

How to Access Support Wherever You Are

Mental health support is available across borders. It may look different depending on where you are, but you are never alone in seeking it.

Expatriate Counsellors: Many international destinations have English-speaking therapists experienced in working with teachers and travellers. Check embassy websites or expat community pages.

Telehealth Platforms: Services such as BetterHelp and Talkspace offer licensed therapy from your phone or laptop. This is ideal for digital nomads or those living in remote areas.

University and School Services: Many international schools provide counsellors for staff. Don't hesitate to ask about mental health resources—they exist to support you.

Embassy and NGO Resources: Most embassies list trusted English-speaking medical professionals. Organisations like Mind International and Psychology Today host searchable therapist databases.

Tips for Wellness Success

- ✓ Keep local and online emergency contacts saved in your phone.
- ✓ Ask your employer about wellbeing support or health coverage.
- ✓ Explore mental health apps for mindfulness and relaxation.
- ✓ Prioritise consistent communication with trusted people.

Remember

Teaching English whether abroad or online changes lives, including your own. The challenges you face are opportunities to grow stronger, wiser, and more compassionate. Prioritising mental health ensures that you can continue inspiring others while protecting your own wellbeing. Take time for reflection, connection, and rest. The better you care for yourself, the greater your impact will be on your students and the communities you serve.

“Healing doesn’t mean the damage never existed. It means it no longer controls your life.” - ***Akshay Dubey***
